United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Lester D. Johnson, Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, U.S. Imports of Merchandise for Consumption, Report FT 125, March 1966. Washington, D.C. June 1966.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 or any Department of Commerce field office. Price: $10 per year domestic, $2.25 additional for foreign mailing, $1.50 single copy.

Special Announcements

1965 ANNUAL IMPORT STATISTICS AVAILABLE IN TERMS OF TSUSA

It was announced in the December 1965 issue of Report FT 125 that import statistics for calendar year 1965 would be published in terms of the Tariff Schedules of the United States Annotated (TSUSA), the 7-digit commodity classification system under which the import statistics are initially compiled. The 1965 annual publication, FT 246, presents data on imports for consumption in terms of the full 10,000 TSUSA commodity classifications. The statistics are in commodity by country of origin arrangement. In addition, a table showing general import data (commodity totals only) for TSUSA commodity classifications for which the 1965 annual difference between general imports and imports for consumption is $10,000 or more is included.

Copies of Report FT 246 may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, for $2.75 per single copy. Order blanks may be obtained upon request to the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

PUBLICATION OF REPORT FT 210, U.S. IMPORTS FOR CONSUMPTION AND GENERAL IMPORTS, SIC-BASED PRODUCT CODE BY AREA: 1965

It was announced in the December 1965 issue of Report FT 125 that a publication containing annual 1965 U.S. import data in terms of commodity classifications based on the Standard Industrial Classification (SIC), would be available in early 1966. The publication is now available and may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, for $1.50 per single copy.

The data in Report FT 210 are in SIC-based commodity by major trading area arrangement. A tabulation, IA 276, presenting annual 1965 import data in SIC-based commodity by country of origin arrangement is available for public reference use at the following locations:

New York Office
Foreign Trade Branch
Economic Operations Division
Bureau of the Census
Room 434 - Customhouse
New York, New York 10004
(Located at Bowling Green)

Trade Information and Publication Section
Foreign Trade Division
Bureau of the Census
Room 2555 - Fed. Office Bldg. No. 3
Washington, D.C. 20233
(Located at Suitland, Maryland)

Statistical Reference Room
International Trade Analysis Division
Bureau of International Commerce
Room 3040 - Commerce Building
Washington, D.C. 20230

The 1965 issues of Report FT 210 and Tabulation IA 276 are the second of an annual series presenting import data in SIC-based commodity arrangement.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics in this report reflect imports of merchandise into the U.S. customs area from foreign countries. The U.S. customs area includes the 50 States, the District of Columbia, and Puerto Rico. Imports into the Virgin Islands (not a part of the U.S. customs area) are not included in the U.S. import statistics, but imports into Puerto Rico from foreign countries are considered to be U.S. imports and are included in the statistics in this report. Shipments between the United States and its outlying possessions (including the Virgin Islands), between the United States and Puerto Rico, and shipments between any of these outlying areas, are not included in the U.S. import statistics. The statistics include both government and nongovernment imports. However, American goods returned to the United States by U.S. armed forces for their own use are not included. Merchandise shipped under customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into U.S. consumption channels; i.e., merchandise released from customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouses for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouses.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carryover of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carryover was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment. Effective July 1965, there was a further increase in the carryover. A change in the procedures for customs verification of statistical information on import entries, effective July 1, results in the receipt of a small percentage of each month's entries at the Census Bureau after the close-out date for that month's statistics.

In general, except for the month when a change in the carryover is introduced, the carryover should have little effect on month-to-month comparisons of overall import totals since the carryover of the previous month should compensate roughly for that of the following month. For smaller segments—country, commodity, and commodity by country totals—there is also some compensation on a month-to-month basis, but comparisons should be made in awareness of the possibility that the figures for a given month may represent more or less than the amounts shipped during the month, especially where the volume of trade is not large.

[1]For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward customs manifest for the vessel).

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from customs custody immediately upon arrival plus merchandise entered into bonded storage warehouses, bonded manufacturing warehouses, and bonded smelting and refining warehouses immediately upon arrival.

Effective with the statistics for January 1966, information on general imports by method of transportation showing imports by vessel, by air, and by all methods of transportation combined are presented in Report FT 350. General import statistics on total trade, trade by commodity, by country, and by customs district are presented in monthly Summary Reports FT 900-1, 930-1, 950-1, and 970-1, respectively. Statistics on the movement of intransit merchandise arriving in or leaving the United States by vessel and summary vessel transportation statistics are contained in Summary Report FT 985 while information on airborne trade, showing shipping weight and value data by selected customs districts of lading and unlading by continent, is published in Summary Report FT 986. Data on trade between the United States, Puerto Rico, and U.S. possessions (not included in this report) are presented in Report FT 800. A more complete description of the coverage and presentation of the statistics mentioned above is included in the specified reports.

SOURCE OF INFORMATION

The source of information for all of the import data included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Customs Officials. Since January 1962, statistical factors of country of origin, net quantity, value, and commodity classification have been verified by customs examiners on formal consumption and warehouse entries. The statistical copy of the entry is corrected by the examiner if he finds that it does not accurately reflect

the information called for by the statistical requirements. Information on warehouse withdrawals which account for approximately 10-percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to education of importers/brokers) by the verification of the warehouse entries to which they correspond. Effective July 1965, imports valued $250 and under are excluded from this verification of statistical data. Prior to July 1965, imports valued under $100 were excluded.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, and therefore excludes U.S. import duties, freight charges from the foreign country to the United States, and insurance. Value information is required to be reported on import entries in accordance with Section 402 and 402a of the Tariff Act of 1930, as amended.

COMMODITY INFORMATION

Commodity Classification

Effective with the statistics for February 1964, the basic import data, which are initially compiled in terms of the commodity classifications in Tariff Schedules of the United States Annotated (TSUSA), are being presented in this report in terms of a rearranged commodity classification system—Schedule A, Statistical Classification of Commodities Imported Into the United States, which is based on the Standard International Trade Classification, Revised (SITC).[2] Schedule A was constructed by the Bureau of the Census in order to provide for the summarization of data for the approximately 10,000 TSUSA classifications into about 2,200 commodity groupings which would be meaningful in terms of commodities important in the U.S. import trade and, at the same time, to provide data in terms of the Standard International Trade Classification outline which are comparable, insofar as possible, to the foreign trade statistics compiled by other trading nations.

A general description of Schedule A and its relation to the TSUSA classifications is presented in a special publication entitled "Changes in Presentation of United States Import Statistics Effective 1964." This publication also contains an outline of Schedule A which shows the TSUSA numbers included in the 7-digit Schedule A codes and gives abbreviated descriptions for the 7-digit classifications and for the 1-, 2-, 3-, and 4-digit levels of summarization. (Complete descriptions for the 1-, 2-, 3-, and 4-digit levels are presented in table 1 of this Report FT 125.) Descriptions at the 5-digit level are not furnished in the special publication since 5-digit summarizations of data are not presented in Report FT 125. However, users may total the data for 7-digit classifications having common first five digits to obtain summaries at the 5-digit level. For the convenience of users who wish to locate individual TSUSA numbers in the new classification system, the above-mentioned special publication contains a list in TSUSA number arrangement showing the Schedule A codes to which the TSUSA numbers were assigned. Further information regarding the SITC, the comparability of Schedule A to the SITC, and the disposition of SITC classifications in Schedule A is also contained in the special publication on changes in presentation of import statistics.

[2]United Nations Statistical Papers, Series M, No. 34, 1961.

The amount and kind of detail in Schedule A was determined on the basis of the estimated magnitude of trade in the various TSUSA commodities arranged within the framework of the SITC. The details of the Schedule A classification system are not considered to be final. Users of the statistics are invited to send comments or requests for changes in classifications to the Foreign Trade Division, Bureau of the Census. Such requests will be given consideration in connection with future modifications which will be made in the schedule.

Presentation of Data in Report FT 125

Table 1 of this report presents value totals for the 1-, 2-, 3-, and 4-digit levels of Schedule A commodity classification. Net quantity and value data for 7-digit Schedule A commodity classifications by country of origin are presented in table 2. In this table, commodity by country data averaging less than $1,000 per month (on a cumulative year-to-date basis) are grouped together and shown as OTH CTYS (Other Counties). Tables 3 and 4 present area by commodity and country by commodity data, respectively, in terms of the 1-, 2-, 3-, and 4-digit classification levels. At the 4-digit level only, area by commodity data in table 3 and country by commodity data in table 4, which average less than $10,000 per month (on a cumulative year-to-date basis) are combined and shown as code 9999, COM AVG UNDER $10,000 PER MO (Commodities Averaging Under $10,000 Per Month).

Availability of TSUSA Data

Information in terms of the 7-digit TSUSA classifications, under which the import statistics are initially compiled, is not presented as such in this report. (A few Schedule A classifications represent individual TSUSA classifications.) However, current monthly statistics in TSUSA number by country of origin arrangement for both general imports and imports for consumption are contained in a machine tabulation, identified as IM 146, copies of which are available for use at Department of Commerce Field Offices in Boston, Los Angeles, New York, Philadelphia, and Seattle, and at the following locations:

New York Office
Foreign Trade Branch
Economic Operations Division
Bureau of the Census
Room 434 Customhouse
New York, New York 10004
(Located at Bowling Green)

Trade Information and Publications Section
Foreign Trade Division
Bureau of the Census
Room 2555, Federal Office Building #3
Washington, D.C. 20233
(Located at Suitland, Maryland)

Statistical Reference Room
International Trade Analysis Division
Bureau of International Commerce
Room 3040 - Commerce Building
Washington, D.C. 20230

Users who wish to do so may obtain data for individual TSUSA parts or subparts in the form of copies of excerpts from the above-mentioned tabulation at a

nominal cost. A sample report which illustrates the content and arrangement of the excerpts, information regarding subscription prices, and an order blank for convenience in placing subscriptions for this special service may also be obtained from the Bureau of the Census upon request.

In addition to tabulation IM 146 mentioned above, information primarily in TSUSA number by country of origin by customs district of entry arrangement is presented in tabulation IM 145, which is on file for reference use at the above-mentioned offices in Washington, D.C. and New York and at the Department of Commerce Field Office in San Francisco, California.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the transactions are credited to the country of shipment.

In table 2 of this report, which presents data in commodity by country arrangement, and in table 4, in country by commodity arrangement, countries are presented in the order of Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered to be a part of the country for statistical purposes. Schedule C is published as Annex B in Tariff Schedules of the United States Annotated. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

Table 3 of this report presents data on imports from major geographic trading areas in terms of 1-, 2-, 3-, and 4-digit commodity classifications. The areas represent groupings of individual Schedule C countries with the exception of Canada, the United Kingdom, and Japan which are treated as separate areas in table 3. Commodity data for Canada, the United Kingdom, and Japan are not included in table 3 but are presented in table 4 which contains data in country by commodity arrangement. A list showing the major geographic trading areas and the individual countries included in each area appears in the January 1966 issue of this report. Also, following table 4, there is an index of areas and countries which shows the countries included in each area. The country designations UNIDENT in table 2 and Unidentified Countries in tables 3 and 4 are used to reflect imports from countries which could not be identified because of illegible reporting on import entries for low-valued shipments.

ESTIMATED DATA FOR LOW-VALUED IMPORTS

Effective with the statistics for July 1965, data on imports valued $250 and under reported on both formal and informal entries (informal entries, by definition, contain items valued not more than $250) are being estimated from a 1-percent sample. For formal entry shipments, this represents a change from the previous practice of sampling shipments valued under $100. No change has been made with regard to sampling informal entry shipments. The estimates for shipments valued $250 and under are shown under commodity codes 9900000, 9900, 990, and 99 and are excluded from the other individual two, three, four and seven-digit commodity codes. However, these estimates for low-valued shipments are included in the section 9 total, the country and area totals and the total for U.S. imports.

From January 1958-June 1965, data on immediate consumption entry shipments valued under $100 and informal entry shipments (valued $250 and under) were estimated from a 1-percent sample. In addition, effective January 1963, data on warehouse withdrawals valued under $100 were also estimated from a 1-percent sample. The estimates for these low-valued shipments were presented under Schedule A number 9999500 from January 1958-August 1963, under TSUSA number 999.9500 effective September 1963, and under Schedule A number 999.0000 effective February 1964.

(Effective July 1965, data on warehouse entry shipments valued $250 and under are being estimated from a 1-percent sample. From January 1962-June 1965, warehouse entry shipments valued under $100 were sampled. Data on these shipments are not included in the imports for consumption statistics in this report but are included in the general import statistics.)

The statistics for commodity codes from which the low-valued shipments are excluded are undercounted to the extent that such low-valued shipments of the particular commodity are made. Effective with the statistics for July 1965, the total value so excluded generally amounts to less than 2 percent of the monthly import total. Although subject to considerable variability,[3] particularly where the estimated amounts are relatively small, these estimates for low-valued imports may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual areas or countries.

For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. In table 2, which contains 7-digit commodity by country data, the number of documents in the sample is shown by country under commodity code 9900000 in the net quantity columns. In the tables containing data in area by commodity and country by commodity arrangements, figures indicating the number in sample for the current month and the cumulative year to data are shown, respectively, following the description for commodity codes 99, 990, and 9900. The number in sample can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two-times-out-of-three basis.

---

[3]The estimated total for low-valued imports reported under commodity number 9900000 is subject to a sampling variability of 4 to 5 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 4 to 5 percent. The estimates by country under commodity number 9900000 are subject to greater sampling variability—around 13 percent for countries with about 200 low-valued shipments in the sample; around 25 percent for countries with about 75 shipments in the sample; and over 25 percent for smaller sample sizes.

the information called for by the statistical requirements. Information on warehouse withdrawals which account for approximately 10-percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to education of importers/brokers) by the verification of the warehouse entries to which they correspond. Effective July 1965, imports valued $250 and under are excluded from this verification of statistical data. Prior to July 1965, imports valued under $100 were excluded.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, and therefore excludes U.S. import duties, freight charges from the foreign country to the United States, and insurance. Value information is required to be reported on import entries in accordance with Section 402 and 402a of the Tariff Act of 1930, as amended.

COMMODITY INFORMATION

Commodity Classification

Effective with the statistics for February 1964, the basic import data, which are initially compiled in terms of the commodity classifications in Tariff Schedules of the United States Annotated (TSUSA), are being presented in this report in terms of a rearranged commodity classification system—Schedule A, Statistical Classification of Commodities Imported Into the United States, which is based on the Standard International Trade Classification, Revised (SITC).[2] Schedule A was constructed by the Bureau of the Census in order to provide for the summarization of data for the approximately 10,000 TSUSA classifications into about 2,200 commodity groupings which would be meaningful in terms of commodities important in the U.S. import trade and, at the same time, to provide data in terms of the Standard International Trade Classification outline which are comparable, insofar as possible, to the foreign trade statistics compiled by other trading nations.

A general description of Schedule A and its relation to the TSUSA classifications is presented in a special publication entitled "Changes in Presentation of United States Import Statistics Effective 1964." This publication also contains an outline of Schedule A which shows the TSUSA numbers included in the 7-digit Schedule A codes and gives abbreviated descriptions for the 7-digit classifications and for the 1-, 2-, 3-, and 4-digit levels of summarization. (Complete descriptions for the 1-, 2-, 3-, and 4-digit levels are presented in table 1 of this Report FT 125.) Descriptions at the 5-digit level are not furnished in the special publication since 5-digit summarizations of data are not presented in Report FT 125. However, users may total the data for 7-digit classifications having common first five digits to obtain summaries at the 5-digit level. For the convenience of users who wish to locate individual TSUSA numbers in the new classification system, the above-mentioned special publication contains a list in TSUSA number arrangement showing the Schedule A codes to which the TSUSA numbers were assigned. Further information regarding the SITC, the comparability of Schedule A to the SITC, and the disposition of SITC classifications in Schedule A is also contained in the special publication on changes in presentation of import statistics.

[2]United Nations Statistical Papers, Series M, No. 34, 1961.

The amount and kind of detail in Schedule A was determined on the basis of the estimated magnitude of trade in the various TSUSA commodities arranged within the framework of the SITC. The details of the Schedule A classification system are not considered to be final. Users of the statistics are invited to send comments or requests for changes in classifications to the Foreign Trade Division, Bureau of the Census. Such requests will be given consideration in connection with future modifications which will be made in the schedule.

Presentation of Data in Report FT 125

Table 1 of this report presents value totals for the 1-, 2-, 3-, and 4-digit levels of Schedule A commodity classification. Net quantity and value data for 7-digit Schedule A commodity classifications by country of origin are presented in table 2. In this table, commodity by country data averaging less than $1,000 per month (on a cumulative year-to-date basis) are grouped together and shown as OTH CTYS (Other Counties). Tables 3 and 4 present area by commodity and country by commodity data, respectively, in terms of the 1-, 2-, 3-, and 4-digit classification levels. At the 4-digit level only, area by commodity data in table 3 and country by commodity data in table 4, which average less than $10,000 per month (on a cumulative year-to-date basis) are combined and shown as code 9999, COM AVG UNDER $10,000 PER MO (Commodities Averaging Under $10,000 Per Month).

Availability of TSUSA Data

Information in terms of the 7-digit TSUSA classifications, under which the import statistics are initially compiled, is not presented as such in this report. (A few Schedule A classifications represent individual TSUSA classifications.) However, current monthly statistics in TSUSA number by country of origin arrangement for both general imports and imports for consumption are contained in a machine tabulation, identified as IM 146, copies of which are available for use at Department of Commerce Field Offices in Boston, Los Angeles, New York, Philadelphia, and Seattle, and at the following locations:

New York Office

Users who wish to do so may obtain data for individual TSUSA parts or subparts in the form of copies of excerpts from the above-mentioned tabulation at a

Abbreviations for Units of Quantity

Abbreviation	Description	Abbreviation	Description
AOZ	Avoirdupois ounce	LFT	Linear foot
BBL	Barrel	LTN	Long ton (2,240 pounds)
BU	Bushel	M	Thousand (1,000)
C	One hundred	MBF	M (1,000) board feet
CAR	Carat	MC	Millicurie
CD	Cord	MLF	M (1,000) linear feet
CFT	Cubic foot	MSF	M (1,000) square feet
CLB	Content pound	NO	Number
CTN	Content ton	PC	Piece
CWT	Hundredweight (100 pounds)	PFG	Proof gallon
DOZ	Dozen	PR	Pair
DPC	Dozen pieces	SFT	Square foot
DPR	Dozen pair	SQ	Squares
GAL	Gallon	STN	Short ton (2,000 lb.)
GLB	Gross pound	SUF	Superficial foot
GR	Gross	SYD	Square yard
GRM	Gram	TOZ	Troy ounce
LB	Pound	YD	Yard
